

RADHI B. RASHO

Location: Lincoln, NE • Mobile: 402-937-6016 • Email: RadhiRasho@gmail.com Portfolio: Radhi-Rasho.dev

OBJECTIVE

Motivated and detail-oriented technology professional seeking opportunities in **software engineering**, **software development**, **full-stack development**, **cybersecurity**, or related technical fields. Bringing a strong foundation in programming, system design, security principles, and analytical problem-solving, combined with a commitment to delivering high-quality results and continuous learning.

SUMMARY OF QUALIFICATIONS

- Experience in large teams and leading projects from start to finish, with key inflection points to present findings, demos and overall project completion.
- Strong communications **detail-oriented**, **analytical**, and **problem-solving** skills. Able to fully visualize and **describe** the thought process through a project/ticket from start to finish and able to thoroughly explain ideas to a non-technical audience.
- Familiar with all three major operating systems: **Windows**, **Linux**, and **MacOS**
- Programming Languages: Adept at **C#**, **TypeScript**, **JavaScript**, and **Python**
- Frameworks: **.NET**, **NextJS**, **VueJS**, **Tanstack Start**, **Svelte**
- Libraries: **ReactJS**, **Shadcn/ui**, **Tanstack Query**
- Proactive learner; readily acquires new skills to overcome challenges.

PROFESSIONAL EXPERIENCE

03/25 – Pre. **Software Developer II**
Assurity - Lincoln, Nebraska

- Refactoring of client facing applications to **streamline** the user experience.
- During investigation of a production support ticket, I was able to find a **bug in the system** and later implement said solution to the bug, leading to improvement and less buggy client experience.
- Integration of an **AI** solution to **auto-adjudicate** claims processing leading to a simplified experience on both business and client side applications
- Spearheaded the creation of an **Optical Character Recognition** system in order to prove the readability of user uploaded files, focusing on **Efficiency** and improving **wait-times** between each upload by more than **50%**.
- Rigorously focused on keeping pipelines clean in order to ensure smooth testing and migration from older flows to newer flows.
- Upheld rigorous coding standards for large frameworks such as **ReactJS** and **.NET**, ensuring consistent and **high-quality code** across diverse projects.
- Oversaw mobile and responsiveness development for large parts of the client facing applications ensuring that there was room for error, making sure that the application worked on older devices given the user data metrics.
- In charge of **Production Support SLAs** for an entire quarter in order to allow room for the rest of the team to be able to focus on their projects and ensure **faster implementation** of project requirements.
- Helped with experimentation while building a brand **new onboarding** for new developers and engineers to simplify the process and ensure **more lasting** basic knowledge.

07/20 – 01/25 **Software Developer**

Sandhills Global - Lincoln, Nebraska

- Orchestrated feature development and bug resolution at Sandhill Global.
- Successfully migrated from Salesforce to a tailored Content Management System.
- Oversaw and optimized **CI/CD pipelines**, streamlining deployment processes for efficiency.
- Proactively maintained the health of the **Monolithic Repository**, implementing updates for continual enhancement.
- Improved deployment safety, speed, and cost-effectiveness through strategic Docker container build optimizations.
- Analyzed Azure cloud service usage data to identify cost-reduction opportunities, leading to **\$20,000** annual savings.
- Mentored new team members in establishing local environments and adhering to **company best practices**.
- Played a pivotal role in contributing to health check systems for over **75%** of the services.
- **Spearheaded** the implementation of common parsers, facilitating smooth transitions services
- Upheld rigorous coding standards for large frameworks such as **ReactJS** and **.NET**, ensuring consistent and **high-quality** code across diverse projects.

COMMUNITY INVOLVEMENT

Dean's List at Southeast Community College, 2018 – 2021

National Honor Society, Lincoln NorthStar

EDUCATION, TRAINING & ACHIEVEMENTS

Associate of Science in Computer Science, present

Southeast Community College, Lincoln, Nebraska

Associate of Applied Science in Computer Information Technology, May 2021

Southeast Community College, Lincoln, Nebraska

High School Diploma, May 2018

North Star High School, Lincoln, Nebraska
